Personal statement

I am a self-taught coder through the use of online skilled bootcamps and courses. Proficient in writing clean codes in front-end languages such as HTML, CSS and JavaScript. I am looking for a technology based apprenticeship to further increase my knowledge in the subject and use my skills under a company for the foreseeable future

Skills

- Proficient writing clean efficient and maintainable code using HTML, CSS and JavaScript

- Can create a UI using bootstrap

- Implement bugging tools into my projects

- Entry level skills in the use of React

- Good collaboration and teamwork skills for projects

About me

I have played the piano for 6 years and tend to do this at weddings and shows from time to time. I am ear trained and enjoy teaching younger children

Coding Achievements

- Created a simple UI design for my Parents food company using bootstrap components

- Developed a beginner level portfolio with the use of react

- Created a responsive layout using CSS
